Summary

Results-driven Information Technology student with applied knowledge in programming, data structures, Artificial Intelligence (AI), Machine Learning (ML), and full-stack web development. Passionate about solving real-world problems and continuously improving through internships, certifications, and coding platforms.

Education

- **Shri Vishnu Engineering College for Women** Bhimavaram, India
Bachelor of Technology in Information Technology 2023 - 2027
CGPA: 8.9/10.00

Skills

Programming Languages: C, Python, Java

Libraries, Frameworks and Tools, Platforms: HTML, CSS, JavaScript, Django, Git and VS Code

Other Skills: Data Structures, Operating Systems, Software Engineering, DBMS, Prompt Engineering, OOPs

Projects

TheraLogic – Medical Treatment Prediction System GitHub

Tech Stack: Python, Scikit-learn, Pandas, NumPy

- Developed a machine learning model to predict personalized medical treatment plans using patient clinical data.
- Implemented data preprocessing and hyperparameter tuning using Random Forest to improve prediction accuracy and reliability.

TrafficVisionAI – Traffic Sign Classification Using Deep Learning GitHub

Tech Stack: Python, TensorFlow, OpenCV, Pandas, NumPy

- Built a convolutional neural network model to classify traffic signs using image datasets.
- Applied data augmentation and early stopping techniques to improve classification performance and reduce overfitting.

StuTrade – Student Peer-to-Peer Marketplace Frontend GitHub

Tech Stack: HTML, CSS, JavaScript, MongoDB

- Developed a responsive peer-to-peer marketplace platform enabling students to securely buy and sell products using verified college email authentication.
- Implemented dynamic product filtering, wishlist management, product listing features, and client-side data handling using JavaScript and localStorage.

Achievements

- **National AI Hackathon Semi-Finalist:** Selected for Phase 2 of a national-level AI Autonomous Hackathon.
- **AI Internship – SkillDzire:** Completed AICTE-approved internship for real-time AI project development.
- **Infosys Springboard Virtual Internship 6.0:** Completed all AI domain certification modules including ML, NLP, and model deployment.
- **IBM SkillsBuild – Artificial Intelligence Fundamentals Certification:** Completed foundational training in AI concepts, applications, and industry use cases.
- **Google Cloud – Introduction to Generative AI Certification:** Completed training on generative AI concepts and applications.
- **DSA Training – Smart Interviews:** Completed training focusing on algorithms and coding problem-solving.

Others

Softskills: Communication, Teamwork, Leadership

Interests and Hobbies: Tech Exploration, Content Creation & Video Editing
